

These documents apply to the Select Masterpieces fabrics in book 2120 that contain the fiber content: 100% Organic Cotton.

### CIRCA 1801 ORGANICS

Organic cotton is sustainable, renewable, and biodegradable, making it an excellent choice as an environmentally friendly fiber throughout its product cycle. For a fiber to be considered organic, it must be raised and harvested in accordance with the strict standards of one or more of the many certification companies within the United States or abroad.

These Organics fabrics are woven using 100% IMO (Institute of Marketecology) certified organic cotton that has been grown through a carefully guided and strictly regulated process.....no pesticides or synthetic fertilizers. All of the organic yarns are dyed by an IMO certified dyer. Each design and color hue has been selected for its relationship to a natural earth.

- Naturally hypoallergenic, healthy, and non-irritating
- Woven with 100% IMO certified organic, sustainable, pesticide-free cotton
- Yarns are dyed using IMO certified, low-impact, earth friendly dyes
- Available with Sustain eco-friendly stain resistant finish with stain release technology
- Available washed with Eco Wash and Sustain finish

#### Sustain finish:

- PFOC/PFOA free
- Environmentally safe
- Non-toxic
- Stain resistant against corn oil, mustard, ketchup, and chocolate
- Does not change the fabric texture, color, or appearance

#### Sustain - Eco Wash finish:

- Uses anti-migrant bio-degradable solvents to prevent color migration
- Process uses 90% less water during wash and 50% less gas during drying time
- Water is recycled
