

VALANCE AND CORNICE INSTALLATION INSTRUCTIONS

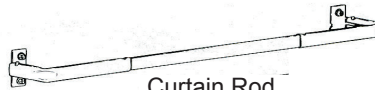

7" Valance with Top and Bottom Rod Pocket

Two curtain or sash rods are included for each valance. The two rods should be spaced so that the top of the top rod and the bottom of the bottom rod are 7" apart.

1. Install the brackets per instructions included with the rods.
2. After the brackets are installed, shirr the material onto both rods.
3. Then install the rods per instructions.

Sash Rod

Curtain Rod

Cornice

Designed for an outside mount, "L" brackets are sent for installation. Place brackets a minimum of 2" in from each end and space evenly thereafter.

1. Mark bracket placement on header board of valance and on mounting surface.
2. Install brackets with screws provided (wall fasteners not included).
3. Place valance on top of the brackets and screw brackets to the valance.
4. Roll face material out and attach to the velcro on the board.

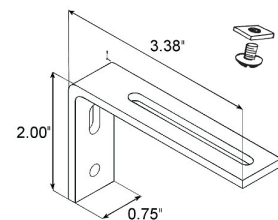

4" Cornice pictured

Channel Panel Valance

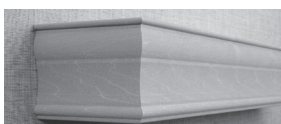

Valances have a 3 1/2" dust cover. "L" brackets with pan head nut and bolts are sent for attachment.

1. Install returns on outside mount valances. Inside mount valances only have returns if specified during ordering.
2. Mark bracket holes on the dust cover. Pre-drill holes for bolts.
3. Mark bracket placement on the mounting surface.
4. Install brackets with screws provided (wall fasteners not included).
5. Place valance on top of the brackets and attach brackets to the valance with pan head nut and bolts.

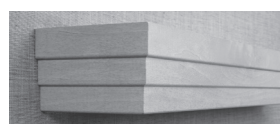

Majesty and Camelot Wood Valances

Valances have a 3 1/2" dust cover. "L" brackets with pan head nut and bolts are sent for attachment.

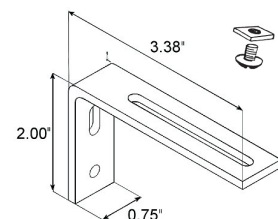

Majesty

Camelot

1. Mark bracket holes on the dust cover. Pre-drill holes for bolts.
2. Mark bracket placement on the mounting surface.
3. Install brackets with screws provided (wall fasteners not included).
4. Place valance on top of the brackets and attach brackets to the valance with pan head nut and bolts.
